- Wrote and defined clean codes to achieve functional and sustainable web applications.
- Contributed to large multi-developer projects using agile methodology.
- Assisted project managers in understanding client requirements and planning technical solutions.
- Assessed data to recommend and plan installation of new systems or modifications of existing ones.
- Created technical documentation, sharing knowledge, ideas and solutions with wider development team.
- Gathered and examined user feedback to improve capacity of software.
- Troubleshoot and debugged software to identify and rectify errors, minimising work disruptions and down time.
- Completed assigned tasks and reached targets working solely in remote working capacity.

Project Description: Zoma is a cloud based SaaS to help IT service sales teams scope intelligently, bridging the gap between the project promise and the reality. Zoma's AI platform brings science to the art of scoping - leveraging existing company knowledge, promoting collaboration, reducing the sales cycle, closing more deals, enhancing customer relationships and their reputations.

Front-end: React.js

Back-end: Node JS, Postgres, MongoDB.

Zalyon is a cloud based SaaS (Software as a service) product which helps the security agencies to solve their operational and employee hiring problem and keep track of their operations in real time.

Front-end: Vue.js

Back-end: Node JS, MySql.

Sibyl Infotech Pvt Ltd, Kolkata, West Bengal (August,2020 – February, 2021)

Job title: Software Developer

Role & Responsibilities:

- Worked closely with other team members to identify and remove software bugs.
- Troubleshoot and debugged software to check and rectify discrepancies.

Project Description: Toolings ERP is software for tracking the various work details like sales details, user details, and product details which helps the client to run his business smoothly. Accounts are also in the software which helps the client to generate some important details of his business.

Front-end: Angular 7.

Back-end: Node JS, MySQL

WRC Technologies (P) Ltd, Kolkata, West Bengal (December, 2019 - July, 2020)

Job title: Junior Software Developer

Role & Responsibilities:

- Continuously developed coding skills and codebase knowledge by attending regular training, overseeing professionals and regular practice.
- Shadowed senior software developers throughout projects to gain expertise in coding and fixing bugs.
- Worked closely with other team members to identify and remove software bugs.

Project Description: **LegalKart** is India's first practice management app for lawyers. It comes with a minimalistic yet intuitive interface that helps lawyers manage their cases across all courts and legal forums across India. **LegalKart** App enables you to manage your law office directly from your mobile like team management, case finance management, client management, and calendar. This App provides additional assistance to lawyers in sending case-related information and updates to their respective clients in real-time. **LegalKart** helps you simplify the complex case updating processes and ensure client satisfaction, without the hassle of e-mails & phone calls.

Front-end: Angular 7, Ionic 4.

Back-end: Node JS, PostgreSQL.

Certification

- **Programming, Data Structures and Algorithms using Python** from NPTEL from January to March, 2017.
- **Step By Step APIs Development In Node JS With Sequelize ORM** from Udemy from July to August, 2020.
